COMPANY OVERVIEW

Flatstone Designs stands as a premier manufacturer of natural flexible stone veneer, pioneering natural flexible stone veneer solutions for architectural and design applications for around two decades. With a steadfast commitment to excellence, craftsmanship, and sustainability, we deliver premium thin-stone cladding that transforms interior and exterior spaces while maintaining the authenticity and elegance of genuine natural stone. Our signature product line combines the timeless beauty of real stone with cutting-edge manufacturing precision, offering architects, designers, and contractors an exceptional alternative to traditional heavy stone cladding. Every sheet produced reflects our commitment to consistent quality, technical precision, and responsible manufacturing.

OUR JOURNEY The roots of Flatstone Designs lie in a small factory in the early 2000s, where two brothers began by providing contract cutting and polishing services for natural stone and manufacturing stone-polishing materials. This hands-on work built deep technical know-how and an intimate understanding of how stone behaves, performs, and finishes in real-world projects.

As the market became increasingly commoditized and driven by credit-based trade, the founders chose a different path—innovation over volume. A turning point came when a client introduced them to a sample of natural flexible stone veneer. Recognizing its potential, they embarked on extensive in-house research and experimentation, often after regular working hours and with limited resources.

In a modest workshop, they began sourcing materials, testing formulations, and refining processes. After numerous trials and refinements, they successfully developed their first commercially viable flexible stone sheet. This milestone marked the beginning of a new chapter. Continued development led to stable, commercial-grade quality, culminating in the company's first order—completed entirely through their own perseverance and craftsmanship.

Gradually, Flatstone Designs shifted its focus fully to flexible stone veneer. What started with two basic patterns has grown into a curated portfolio of more than fifty designs, suited to a wide spectrum of architectural, interior, and product applications.

As the next generation joined the business, operations were modernized, systems strengthened, and the brand expanded from a regional supplier to a pan-India player with a strong export orientation. Today, Flatstone Designs stands as a trusted name in natural flexible stone veneer, uniting craftsmanship, innovation, and technical precision. What began as an experiment has evolved into a global-facing brand built on quality, resilience, and a legacy carved in stone.

MORE ABOUT DIY SELF ADHESIVE

COLOR:

We are manufacturing these as per the orders.
We can make this in all colors of available veneer.

SIZE & PACKING:

Size of piece: 15x60 cm
Packing: 10 pcs shirred and put in
corrugated box with hanging system.
One box contain 0.90 m².

EASY TO INSTALL

1

POSITION

Position the panel on
the wall to plan
your layout.

2

ALIGN & PRESS

Align the panel and
press firmly from the
center outward.

3

PEEL

Peel off the release
paper from
the back.

4

CUT & FIT

Cut with scissors or
shears to fit around
edges and outlets.

BEAUTIFUL RESULTS. TIMELESS STYLE.

Classic look. Unique you.

INSTALLATION GUIDE

LAMINATION

Stone Veneer can be used the same way thin laminate type products are used. Testing should always be done prior to any natural stone veneer installation.

It can be arched or bent inward or outward to meet a given look or architecture. Fiberglass strand are used in the makeup of Stone Veneer which gives it strength and flexibility.

Installation can be easily done using many of the basic tools used in most tile work.

For industrial processing, we recommend using diamond blade tools due to strong wear on wood blades.

Prior to application it is best to clean, brush, and degrease any surface of dust or oils. Depending on the adhesive used, it may be necessary to prep the back of the Stone Veneer by sanding the surface to expose the fiberglass.

If Stone Thin Veneer is only applied at one side of a carrier material, it is important to have a counter balance on the other side for stability. Some adhesives may require the use of solvents or recommended primer by the adhesive manufacturer.

It is recommended that each sheet be dry fit exactly where it will be placed on all surfaces. Numbering the sheets to track relocation before cutting and trimming will save you time.

ADHESIVE

All adhesives should be tested prior to any installation including consideration of moisture and temperature in the planned environment. If the application is outdoors, consideration to thermal expansion should be taken into account. Since the sheets is only a veneer it must expand and contract the same as the substrate or delamination may occur. Where adhesive primers are recommended the bond should be test by the installer before final installation.

ADHESIVE FOR INTERIOR ALL SURFACES INCLUDING WOOD BASE SURFACE

- 1) AGL Power Grace PG-1000
- 2) Mepal Keralstick T
- 3) Kerakoll Supraltex
- 4) Fevicol Pro bond
- 5) Silicon
- 6) Or any PU Based Adhesive

ADHESIVE FOR EXTERIOR CEMENT BASE SURFACE

- 1) AGL Power Grace PG-1000
- 2) Mepal Keralstick T
- 3) Kerakoll Supraltex

SEALANT

ADHESIVE FOR BACKLIT LIKE MIRROR/ACRYLIC BASE SURFACE

- 1) Clear silicon

Stone Veneer can be sealed with the same sealers used for slate, stone tiles, and wood. There are many sealers on the market with various recommended applications. Please test any sealer for the desired glint and saturation required prior to installation. By a single treatment with a good stone sealer, almost all natural stone surfaces are easier to maintain. Not only water but also oil and grease can no longer penetrate into the surface. Sun spots are prevented.

SEALANT FOR SURFACE PROTECTION INTERIOR/EXTERIOR

- 1) Ascolite Sealer
- 2) MMC Sealer
- 3) Endura max Sealer
- 4) MYK Laticrete Sealer
- 5) Exterior PU
- 6) Interior PU

The areas which are indoor and dry, there is no need any sealant but outside and wet areas like bathrooms, we suggest above sealants.

REGULAR MAINTENANCE:

All natural stone surfaces, even if impregnated (sealed), must be wiped moist regularly. We recommend Care Cleaner, which contains a small amount of the impregnator which insures the surface stay sealed. The care cleaner is mixed with water and then can be mopped over the surface not recommended.

GENERAL TECHNICAL SPECIFICATIONS

Front	Real-Stone
Back	Glass Fibre, Fabric in Polyester Resin Matrix
Temperature Limits:	-50 / +95 °C
Formaldehyde:	Stone-Veneer is formaldehyde-free
Thermal Expansion (90 °C):	0.5 – 0.8 mm/m (≈0.08 %)

SPECIFIC TECHNICAL SPECIFICATIONS

Thickness (mm)	1.5-3
Weight per Sheet (Kg):	1-2
Water Absorption (%) ASTM C-121:	1.9 (Front Surface Only)
Average abrasion (mm) IS: 9162-1979:	0.9
Maximum Abrasion (mm) IS: 9162-1979:	1.0
Life span (Years) - durability	7-10

Flexible Slate Stone Veneer can be bent or fixed to a radius of 360mm along the length. The width is not recommended for bending. Due to the nature of the different thicknesses of the individual items, the degree of radius varies per item. Fabric backing sheets are more suitable for such kinds of installations including edge bending operations in the woodworking industry.

ANALYSIS TEST RESULT

S. No.	Parameter	Test Method	Result
1	Water absorption (% by mass)	ASTM C-121	1.96
2	UV Resistance Test	ISO 1157	No sign of color fading and visual defects observed at 96 Hr
3	Abrasion Resistance Test a) Average Wear (mm) b) Individual Wear Maximum (mm)	IS 9162-1979	a) 1.0 b) 1.2
4	Thermal expansion (change in thickness)	ISO:10545-8:1994	0.04
5	Steam diffusion passes test	ASTM C-1556	No sign of defects observed
6	Emission Test (Flammability Test)	ASTM E-119	No sign in surface defects observed or catch fire Up to 500 °C
7	Freeze thaw resistance test	ASTM C 1262	No sign of cracking or any defects observed
8	Chemical resistance test	IS:10545-13:1995	No sign of discoloration or visual changes observed
9	Density	IS:12866-1989	1.93
